CHANGE HAS ALWAYS BEEN PART OF OUR DNA

AMBITIOUS GOALS THAT DRIVE US

Hitting zero is ambitious, but it has to be done. And not just by 2050. That is why we have set ourselves the goal of achieving net zero greenhouse gas emissions for all our upstream activities by 2030.

Searching for solutions and breaking new ground is what drives us as engineers and energy pioneers every day. This is a contribution to global climate goals that we can and will make.

Net Zero
~~2050~~

2030!
